What is Slidenv?

Slidenv is a slides maker and presenter designed for developers, consist of the following features

-  **Text-based** - focus on the content with Markdown, and then style them later
-  **Themable** - theme can be shared and used with npm packages
-  **Developer Friendly** - code highlighting, live coding with autocompletion
-  **Interactive** - embedding Vue components to enhance your expressions
-  **Recording** - built-in recording and camera view
-  **Portable** - export into PDF, PNGs, or even a hostable SPA
-  **Hackable** - anything possible on a webpage

Here!

Code

Use code snippets and get the highlighting directly! [1]

```
1 interface User {  
2     id: number  
3     firstName: string  
4     lastName: string  
5     role: string  
6 }  
7  
8 function updateUser(id: number, update: User) {  
9     const user = getUser(id)  
10    const newUser = { ...user, ...update}  
11    saveUser(id, newUser)  
12 }
```

Components

You can use Vue components directly inside your slides.

We have provided a few built-in components like `<Tweet/>` and `<Youtube/>` that you can use directly. And adding your custom components is also super easy.

```
1 <Counter :count="10" />
```

Check out the guides for more.

```
1 <Tweet id="1390115482657726468" />
```

Slidev
@Slidevjs

1K Stars on the Launch Day?!
That's awesome! Thank you :)

BTW, v0.3.0 just released with
LaTeX math support!

Themes

Slidev comes with powerful theming support. Themes can provide styles, layouts, components, or even configurations for tools. Switching between themes by just **one edit** in your frontmatter:

```
1  ---
2  theme: default
3  ---
```

```
1  ---
2  theme: serif
3  ---
```

Read more about [How to use a theme](#) and check out the [Awesome Themes Gallery](#).

Animations

Animations are powered by [@vueuse/motion](#).

```
1 <div
2   v-motion
3   :initial="{ x: -80 }"
4   :enter="{ x: 0 }">
5   Sliddev
6 </div>
```

LaTeX

LaTeX is supported out-of-box powered by [KaTeX](#).

Inline $\sqrt{3x - 1} + (1 + x)^2$

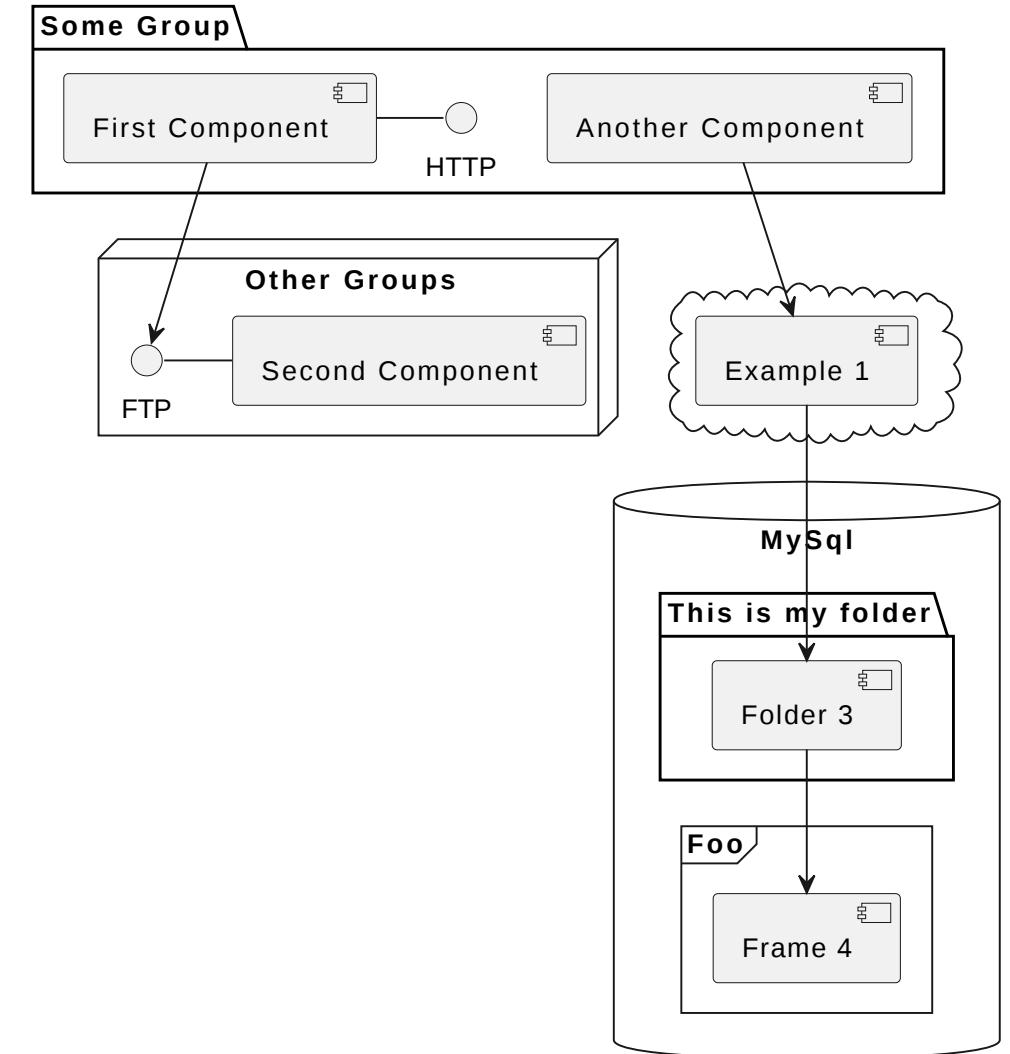

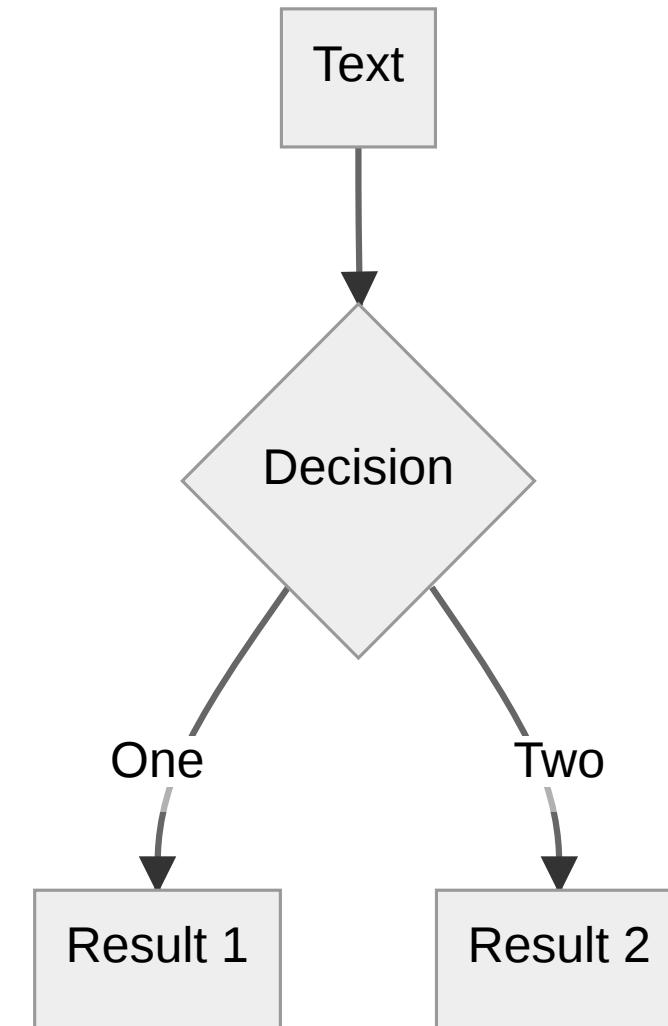

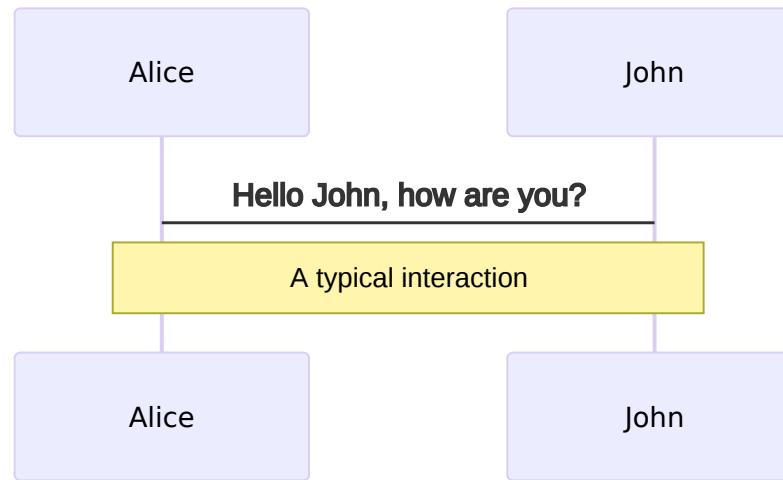

Block

$$\begin{aligned}\nabla \times \vec{\mathbf{B}} - \frac{1}{c} \frac{\partial \vec{\mathbf{E}}}{\partial t} &= \frac{4\pi}{c} \vec{\mathbf{j}} \nabla \cdot \vec{\mathbf{E}} &= 4\pi\rho \\ \nabla \times \vec{\mathbf{E}} + \frac{1}{c} \frac{\partial \vec{\mathbf{B}}}{\partial t} &= \vec{0} \\ \nabla \cdot \vec{\mathbf{B}} &= 0\end{aligned}$$

[Learn more](#)

Diagrams

You can create diagrams / graphs from textual descriptions, directly in your Markdown.
